

## Product Data Sheet Type: MC726

Group: ACCESSORIES Mounting Material

Mounting clips

For device :	TO 220
Device mounted by :	Clip Mounting
Surface :	Bronzed
Material :	Spring Steel

Mounting clips facilitate the safe and efficient mounting of semiconductors to heatsink with the corresponding clip groove see page 32-34 - Spezial Heatsinks or page 39-41 - Standard Extruded Heatsinks.

Especially for insulated mounting, a clip provides reliability by making screws and insulation bushes dispensable.

Central contact pressure distributes the heat conductivity equally across the semiconductor/heatsink contact surface.

- Material: Spring steel (C67)
- Surface: bluing
- Width: 15,1 mm
