

Product Data Sheet Type: SI487-S

Group: ACCESSORIES Thermal Interface Material

Silicone washers

Electrical insulating :	2,5 kV
Thickness :	0,18
Dielectriccoefficient :	2,56 at 1MHz
Minimum thermal resistance :	1,3 K/W
For device :	TO 220
Device mounted by :	Clip Mounting Bonding
Material :	Silicon w. Glasfibre

Insulation wafer - silicone (Glass fibre reinforced)

self-adhesive on one side, for clip mounting facilitate insulated mounting of semiconductors, e.g. to heatsinks.
They are highly flexible and ensure optimal heat conductivity even without using thermal compounds.
